COOPERATIVE/HUB COORDINATOR

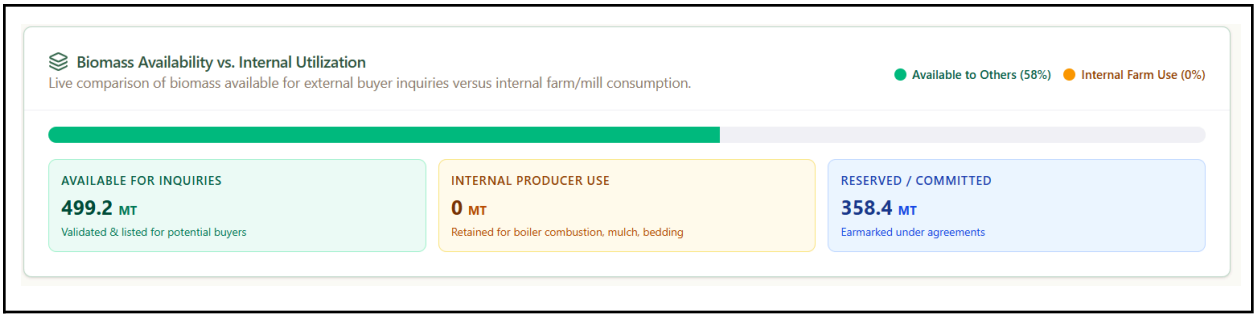

Hindi na dapat required to. Required lang sya kapag may available pa para maibenta. Like available pa sya sa market. Kung wala ng natira or wala ng available hindi na dapat required maglagay sa date.
[When creating a biomass record. This shouldn't be required. This is only required when there is available biomass to sell. Like its available in the market. If theres nothing available it shouldn't be required to input the date.]

It should be recorded here kung ilang current internal use and reserved / committed.
[In the Record Details. It should be recorded here how many current internal use and reserved / committed.]

Yung submitted by is dapat name and anong role nya ang nakalagay NOT ID.
[In the "Traceability & Access", the "Submitted by:" should display the "name and role" of the user who submitted, NOT the ID]

In the Dashboard. The “Biomass Availability vs. Internal Utilization”, Maintain this but the “Internal Producer Use” is not recorded in real time unlike the “Available for Inquiries” and “Reserved/Committed”.

Siguro ang gawin nalang dito is kapag naka submit na ang buyer ng inquiry it’s either accept or decline the inquiry nalang then proceed na ang chat. Kung di pa aaccepted ang inquiry bawal pa mag chat. But maintain alng yung ibang features nya sa manage inquiries.
[In the “Manage Inquiries”, the “Buyer Inquiries & Communication”, I think this right here, when the Buyer submitted an inquiry its either “Accept” or “Decline” the inquiry and then it proceeds to chat/conversation. If the inquiry is not yet accepted, you dont get to access the chat. Other than that, maintain the other features in the “Manage Inquiries”]

Buyers must withdraw their inquiry then may lalabas na parang confirmation like “are you sure to withdraw this inquiry?” then clickable na “yes” or no”
[Buyers must have an option to withdraw their inquiry, and when interacting with it there would be a pop-up confirmation saying like “Are you sure to withdraw this inquiry?” and then buttons saying “Yes, I want to withdraw.” and “No, I want to keep the inquiry.”]
