COOPERATIVE/HUB COORDINATOR

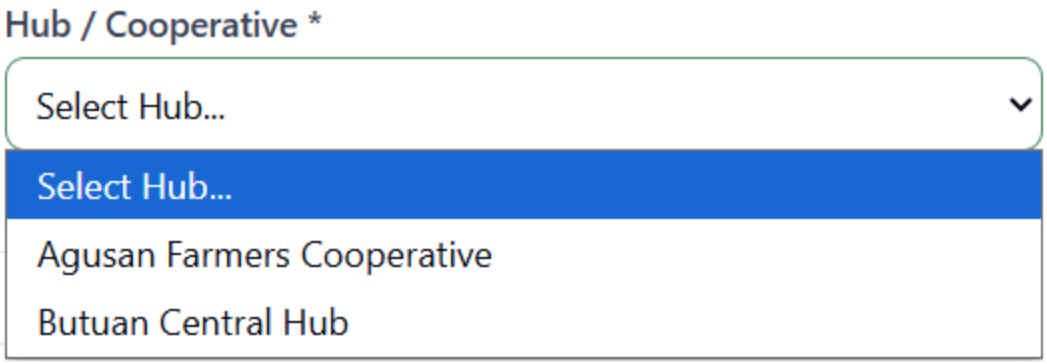

Walain ng Bags (50kg) paalitn ng ms appropriate.
[Remove “Bags (50kg)” and replace it with the correct unit of weight like below the kg. Which would be more appropriate.]

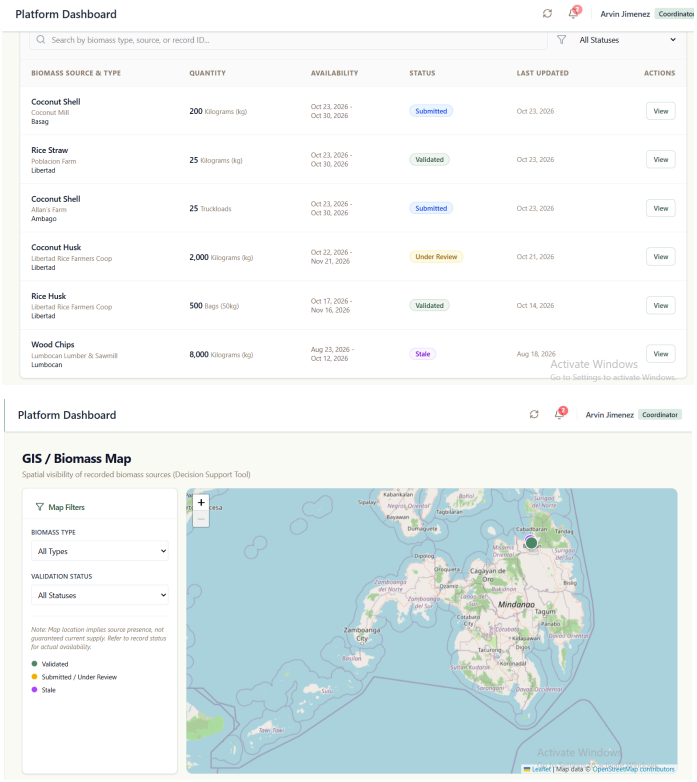

Mas better na walain nalng to.
[Its better to remove this check box “Theoretical Estimate”]

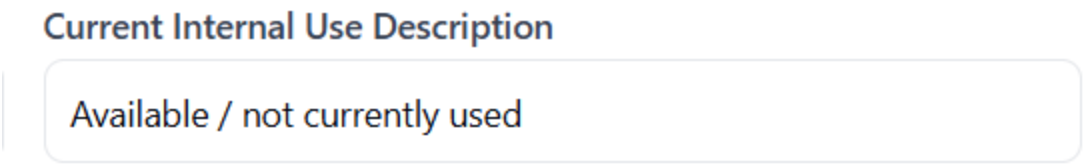

Maintain this but dili dpat syaa required.
[The "Availability Start Date" and "Availability End Date" maintain this but it shouldn't be required]

Hindi dapat sya required and dapat pwede pa sya maka input ng other na Coop or Hub.
[This shouldn't also be required and add a way for the user to input other Coop or Hubs.]

Dapat yung mga naka record na biomass is mag reflect din sya sa GIS/Biomass Map
[The GIS/Biomass Map should display the recorded biomasses.]

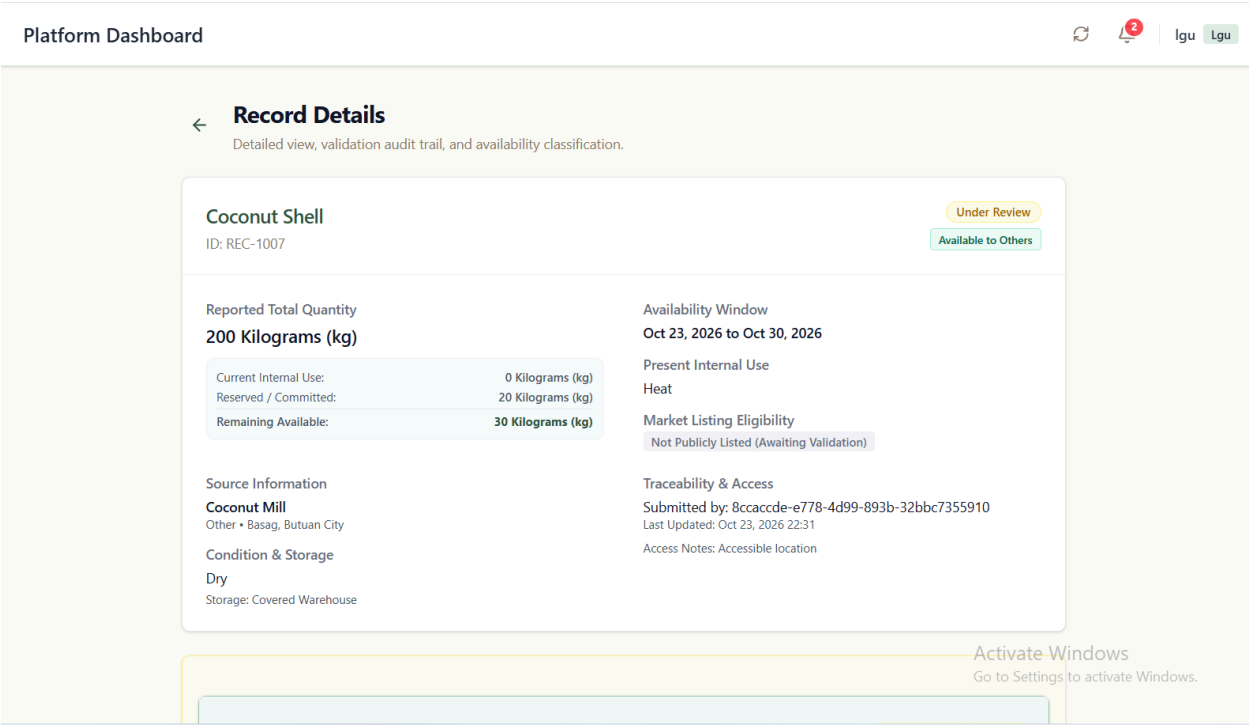

Fix this dpaat ang nandito is yung pwede maaka type kung anong ginagawa nila sa biomass nila like for heat, boiler cumbostion etc…
[Fix this. It should've mlet the user type what they did with the biomass like for heat, boiler combustion, etc,,.]

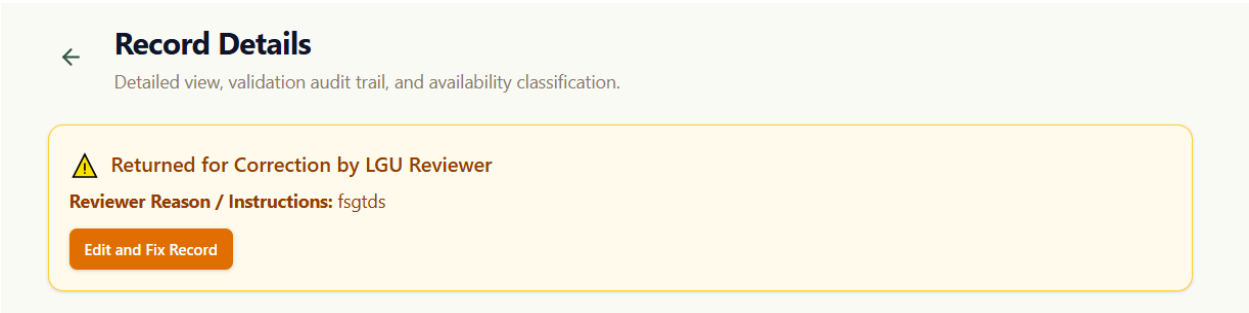

Too many choices, kasi nag order sya so need nalang syang iacknowledge or if ever man na may parang chat box or convo parang messnger after iacknowledge ng coop ang bibilhin ng buyer.
[Too many choices since the user ordered. The order must be acknowledged or like a chat box or a way to have a conversation like the facebook messenger after the order got acknowledged by the Coop on what the buyer bought.]

Additionally, dapat ang coop/hub coordinator na user is may specific sya na location or saan ang office nila para maindicate or masama sa buyer inquiry ang location ng office nila malaman nila kung saan nila kukunin. Bukod ang biomass source location sa kung saan ito nasubmit na office. Right?
[Additionally, the Coop/Hub coordinator user should have a specific location or where their office is located to indicate or could be included in the Buyer inquiry the location of the office to know where they can claim the order. Like providing the biomass source location on which office it got submitted to.]

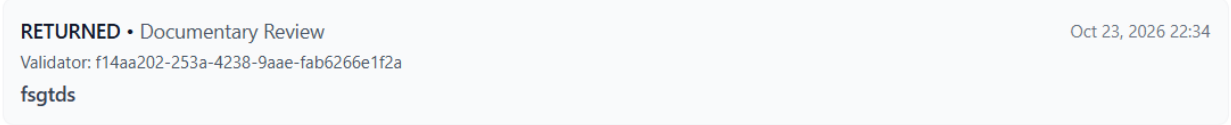

LGU

Ang sa details niya like sa current internal use and reserve is diba dapat meron syang value. Tamang calculation.
[In the “Record Details” like the current internal use. The “Reserve” should like value. The right calculation]

Ito is dapat nasa coop/hub coordinator na side.
[This part talks about moving the "Returned for Correction by LGU Reviewer" found in the Record Details to the Coop/Hub Coordinator side.]

Dito dapat is nakalagay ang name ng Validator not ID.
[This part should display the name of the Validator not the ID.]
